This game is one of the first games in the Sherlock Holmes game franchise, So of course it is a old game and in all fairness the story and puzzles all still hold up well in todays market

But as all earlier Sherlock Holmes games the voice acting is quite bad and of course the interface and also the movement are quite terrible, But if you can overlook these flaws then this is a game to enjoy for hours on end

<https://www.youtube.com/watch?v=UY0gBfCKm3s>. surprisingly fun. remember to save.. Fantasy Mosaics 14: Fourth Color is a nice small game of nonograms with colors. According to the numbers, you fill the field with colors to reveal an image. It's not a game where you have to think a lot, but can easily spend hours puzzling.

The setting feels nice with warm and vibrant colors. If you make a small mistake, you can't undo that, but you can replay the whole level and go for a gold medal anyway. You even get small assets which help you complete the game, but I never used one of them. The puzzles are not very challenging, making it a great game to just relax.. Disregard my playtime I let this game run in the background alot.

My total playtime is more in the 50h range.

I wasn't all that familiar with Yuzusoft VNs before, but this one turned me into a fan.

Art: Nothing to complain at all. The Character art is fantastic.

Music: Is not to noticeable overall, but I noticed myself humming along to some of the tracks. Some of the Ending Songs are great too.

Story: Nothing worth mentioning. The Characters are the stars of the show and I loved all of them.

Routes: The Game offers 5 Routes (one of them has to be unlocked by finishing 1 route first).

Most of the routes were really enjoyable to me.

The one route that made me want to punch my monitor many times was Tsumugis (sorry tsumugi fans).

A certain prominent character in that route is beyond annoying and ruined my enjoyment.

I recommend this to anyone who enjoys beeing assaulted by cuteness.

I don't have anything to add what hasn't been said already.

Meguru is best girl.. The f**king Royalty free music is everywhere!! Decided to conform to the Vince McMahon philosophy of bigger guys with no mic skills being champion, and silly divas angles mized with an assortment of squash matches that buried potentially good talent. Went bankrupt.

10V10 - Not realistic. Survivor: The Living Dead's promied additional content is really going to be the making of it. The groundwork is solid; at the moment, it's an enjoyable zombie defense title based on Romero's seminal 1968 movie in which you repel the undead menace from a two storey house by way of various weapons and traps. You begin in the reasonable 7 minute mode before heading into bumpier territory with th 12 and 14 minute challenges, unlocking multiple bonus weapons and gameplay variables as you go.

The controls need tweaking. The mapping is fine and feels comfortable but command areas for certain item pick-ups and especially the stairs are a little too small to comfortably use in the middle of a zombie panic. Dev also needs a fullscreen fix as soon as possible as the text is a nightmare to read in the tiny windowed mode that Survivor boots in.

Easy thumbs up at this stage though. Plenty of potential.

<https://www.youtube.com/watch?v=4SvXO-W3KoE>. I dont know why people are complaining about it... It costs 99 cents. This game is worth it.. The game is broken once you get to the mine cutscene. There is no nudity because everything is censored. In other words the game is not finished and they use false tags to advertise it.

The translator is in love with the word "the" and it's used wrong so often it gives even an idiot a headache.

The game has a good concept to it but it is just executed poorly. It has potential if they ever fix it but even on sale it's not worth it.. I used to regret having bought this since it was little better than shadowplay. Now it is much better. It has minor advantages like changing source volumes so your mic is easily louder than your game and more complex advantages like specific bitrate, GOP size, and keyframe interval. The ability to fine tune your pre-record buffer is also nice as well as the various overlay options.

Originally, I got it as shadowplay couldn't handle certain older games but now I prefer to use it.

This game is a fantastic strategy game!

You have to exercise lateral thinking when executing attacks because each galaxy(atleast that ive played) are all different shapes and orbits.

Definitely reccomended for people who are curious about large scale space warfare.. Not much to about a perfect indie, I loved it because this game really nailed it, this kinds of game are not needed to be free as they are great, many bad games cost up huge but this game is great and free too, so DON'T EVER DARE TO MISS this chance, because you will love it when you will play it..... Love the skin, however it would be a veri nais idea to add a "Tribal Monkey" to the game, or to Bloons TD 6, I would love to see that. Would actually be nice if they added more popular song (vocaloid, camellia, soundvoltex, XI, and those things) and reduce the DLC cost cuz it's gonna burn ur wallet for some random songs. Gameplay itself is decent although you can just play osu and download the skins, but overall i'll give this game a 8/10 for now. We (me and my wife) gave it a try and first trial the game froze.

The second time we almost made it! Missed by a few seconds.

Finaly made it to the end the only thing we didn't do on the second trial is the last action to do. But I can't tell what it is.

We love these games and found this one pretty good.

The negative point is the controler is not friendly user trigger and grip are opposite to other games we have played.

Maximum of one hour to escape.. Swanky apartment is nice! So many interesting things... Fish are my favorite. You can zap them with lasers! I wasn't good in helicopter, but will keep trying. Very much joy!
